

What's Happening in 3rd Grade?

Week of February 22-26

Math

This week we will continue our addition and subtraction unit. We will learn how to solve 2-step addition and subtraction word problems using the strategies we have learned. On Wednesday we will review for our test and on Thursday we will take our addition and subtraction strategies test. On Friday we will take a pretest for our next unit: Fractions.

Word Study

This week we will look closely at words and their meaning. We will also look at word relationships.

Reading

This week we will finish up our nonfiction unit and then move back into fiction. We will be learning how to synthesize as we read. Synthesizing is how our thinking grows and changes as we read.

writing

This week we will practice writing a TDA (Text Dependent Analysis) to prepare us for the SC Ready test. We will learn strategies for making our writing better and make sure we answer the question with evidence.

Important Dates

Make sure you charge your chromebook every day!
